TryHackMe: tryhackme.com/p/abhisheksinghyadav0004

PROFESSIONAL SUMMARY:

MCA student with a strong foundation in Cybersecurity, Network Security, Cloud Computing, and Web Security. Interested in defensive security, SOC operations, security monitoring, incident response, and IAM. Hands-on learning through security-focused projects and TryHackMe rooms covering SOC fundamentals, log analysis, incident response, digital forensics, cyber kill chain, and threat intelligence. Seeking an entry-level Cybersecurity, SOC Analyst, or IAM Security internship.

TECHNICAL SKILLS:

Cybersecurity: Network Security, Web Security, OWASP Top 10, Threat Analysis, VAPT Fundamentals, Phishing Detection.
Blue Team Fundamentals: SOC Operations, Security Monitoring, Log Analysis, Incident Response Fundamentals, Digital Forensics Fundamentals, Threat Intelligence.
Identity & Cryptography: IAM Fundamentals, Authentication, Authorization, Steganography, Cryptography Fundamentals.
Systems & Programming: Linux, Windows, Python, Java, C, JavaScript, Git, GitHub.
Web Development: HTML5, CSS3, React.js, Node.js, Express.js
Databases & Cloud: MySQL, MongoDB, AWS, Oracle Cloud Infrastructure, Microsoft Azure

ACADEMIC PROJECTS:

1. **TechCorp IdentityHub — IAM & Identity Security**
   - Designed an IAM-focused identity management project covering user provisioning, authentication, authorization, and role-based access concepts. • Structured identity and access workflows to support secure account management and least-privilege practices.
2. **Omni Sentinel & CyberSentinel AI — Security Monitoring**
   - Developed a real-time endpoint security monitoring dashboard to track system health, detect risk indicators, and display live alerts through a SOC-style interface. • Implemented automated threat-analysis layers to support security monitoring and network logging.
3. **PhishShield AI & SecureWeb Guard — Web Security**
   - Built security applications focused on malicious URL and phishing detection using defensive security concepts. • Worked with web security mechanisms and common OWASP Top 10 vulnerability concepts.
4. **StegoShield — Steganography & Cryptography**
   - Developed a security project focused on hiding information within digital media and understanding cryptographic protection concepts. • Explored secure message handling, data encoding, and confidentiality-focused techniques.
5. **Password Breach Checker & Strength Evaluator**
   - Created a security tool that checks user-submitted credentials against known data breaches through API integration. • Designed a responsive React.js frontend to evaluate password strength using cryptographic best practices.

CYBERSECURITY TRAINING & PRACTICAL EXPERIENCE:

TryHackMe — Blue Team / SOC Learning | Completed rooms focused on defensive security fundamentals
• SOC Fundamentals | Logs Fundamentals | Incident Response Fundamentals | Digital Forensics Fundamentals | Junior Security Analyst Intro | Cyber Kill Chain | Pyramid of Pain.

EDUCATION:

- **Master of Computer Applications (MCA) —** MIET College, Meerut | Pursuing
- **Bachelor of Computer Applications (Cloud & Cyber Security)** — IIMT University, Meerut | 2024

CERTIFICATIONS:

- **Cisco** — Ethical Hacking Certificate
- **IEEE** — IoT Security Certificate
- **Oracle** — AI Foundation Associate Certificate
- **EC-Council** — Certified Secure Computer User (CSCU)
- **Linux** — E & ICT Academy, IIT Kanpur
- **Cyber Security** — E & ICT Academy, IIT Kanpur
- **Cloud** — E & ICT Academy, IIT Kanpur
- **Advanced Cloud** — E & ICT Academy, IIT Kanpur
- **Computer Hacking Forensic Investigator (CHFI)** — E & ICT Academy, IIT Kanpur
